

Screen is Sideways

How to fix the problem

Log in to your computer.

Right click the desktop and locate the dialog box for graphic options.

Open the graphic options tab and then graphic properties.

From this dialog box locate the screen rotation tab.

Click the screen rotation tab.

The next dialog box will display a menu enable Rotation.

Click the normal box then click apply then click OK.

Your problem should be resolved

Menu's for a Desktop is somewhat different from a Laptop but basically the same procedure will apply.

Sometimes solving this problem is as easy as clicking CTRL + arrow key combination, but it is best to adjust it from a menu if possible.
